### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Receipt is acknowledged of preliminary amendment and IDS filed on 3/3/04. The preliminary amendment canceled claims 1-49 and added claims 50-68. Claims 50-68 are pending in the application and the status of the application is as follows:

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 50-68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following reasons apply:

The recitation of “containing” from 1-30 carbon atoms lacks clarity. The meaning of containing is same as comprising and when applicants use this expression to define the carbon atom range it implies that it includes mixtures of compounds. Note that carbon atoms have fixed chain length. Deletion and inserting “of” is suggested to overcome the above rejection.

What is meant by “sol”? In 63-67 ?

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 50-68 are rejected under 35 U.S.C. 102(e) as being anticipated by U. S. Patent 6,352,699 ('699).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

See col.3, line 25 for formula IA which is the same compound claimed, see the definition of R1 at col.3, line 41, see col.4, lines 55-58 for the species, see col.2, for recitation of "sol", see example 1 for the concentration of the organometallic compound which is within the claimed ranges, see also col.6, lines 30-47 for the ranges, see col.7, lines 45-49 which reads on the claimed method of "protecting the hair" since the patent discloses that even after several washes using water and shampoo, the initial waviness of the hair is retained" and the disclosure at col.8, lines 1-9 reads on the claimed method of strengthening a keratin material. The compound is same and application of the compound to the keratin (nail) is same, therefore the method

Art Unit: 1615

claimed in claims 53-59 and the method claimed in claim 69 in the body of the claim “ effective to reduce the brittleness of the human nails “ is inherent.

The use of the term “ comprising” permits the presence of other ingredients and does not preclude the presence of other ingredients, active or inactive, even in major amounts. Moleculon Research corp., v. CBS, Inc., 793 F. 2d 1261, 229 USPQ 805 (FED. Cir. 1986); In re Baxter, 656 F. 2d 679, 210 USPQ 795, 803 (CCPA 1981).
